EXPERIENCE

Uber, Product Designer

New York, Apr '21 - Present

Currently working on Uber Eats on internal tooling.

With over five years at Uber, I have led end-to-end design initiatives across both Rider and Uber Eats experiences. I began on the Safety Design team, delivering user-facing solutions such as Insurance Hub, Safety Messaging, Ride Check, and Review Center, while partnering with external organizations like Farmers Insurance to shape product strategy through research and collaborative workshops. I later led Road Safety initiatives, launching Driving Insights and CMT Risk Score from concept to production, and guiding cross-functional alignment through critiques and stakeholder engagement.

After transitioning to Uber Eats in New York City, I led the redesign of the Catalog Manager and currently drive Internal Tooling efforts, building scalable platforms that enable operations teams to create, experiment with, and manage promotions, customized storefronts, and other critical experiences.

OLX Brasil, Product Designer

São Paulo Oct '19 - Mar '21

Digitization of the car buying and selling experience

Led strategic research initiatives that influenced the product roadmap for the vertical, including conducting extensive user interviews to develop personas for the car experience. Facilitated workshops across multiple regions in Brazil to better understand the end-to-end car buying and selling journey.

Played a key role in establishing a cross-functional Illustration Team to

clients that need to pay their debts

- Alongside the client's management team, created the design and delivery schedule for the new product
- Informed the product design with exploratory design research with users across all of Brazil, ghosting and mapping the service blueprint
- Contributed to the design system with new components, by designing, testing and evaluating their results
- Designed across multiple platforms: mobile desktop, Brazil's application, LATAM application and Spain application
- Managed stakeholders from client, third parties and Accenture

2015 edition of What Design Can Do in Amsterdam.

- English Mentor at Cidadão Pro Mundo NGO
- Volunteer designer for the Female and More Nigerian NGO
- Mentor for young designers at Mentora

Quality Inteligência (Helicidade + Cushman + MagaLu + Centauro, Fiat Chrysler) , UX/UI Designer

São Paulo, Jun '17- Sep '18

- Lead UX/UI designer for security and management digital products, such as MagaLu, Cushman, DHL and Fedex.
- Informed product design by leveraging insights from research, ghosting and interviews
- Helped organizations such as MagaLu, Cushman, DHL and Fedex to achieve their security goals and access control at their distributions centers
- Translated complex experiences (such as helicopter landing procedures) into user journeys and flows
- Designed wireframes, prototypes and final designs for mobile desktop, native applications and dashboards
- Researched complex compliance laws and guidelines for heli centers and hospitals, and distilled the information into understandable simple concepts
- Managed a team of 5 members, from junior designers and front end developers to assistant level collaborators.
